JULY ROTARY pulse

GOVERNOR'S MONTHLY LETTER
For Private Circulation only

ROTARY:
MAKING A
DIFFERENCE

Vol. 01

Dear fellow Rotarians,

Rotary Greetings!

'The old order changeth yielding place to new'. With the change of guards, the new responsibilities have arisen; with the new responsibilities the new problems and with the new problems the new challenges. I congratulate the Presidents , Secretaries and their team and our district officers on assuming new roles assigned to them.

R I President Ian H.S. Riseley has ,in his address, exhorted us to save this planet of ours from total extinction by making our environment free from degradation. The emission of poisonous gases; the felling of trees which cause landslides and dry up water resource have vitiated our environment. The climate change that is fast taking place is a vivid example of environmental degradation. The recent example is that of heat wave that is lashed Europe. We, as Rotarians, not only have responsibilities towards the people but towards this planet also. Therefore, we must try with all our might and main to make our environment clean and free from pollution by planting saplings. Let us take a pledge to plant trees and nurture them so that our planet may become green again.

The month of July has also been embarked for blood-donation. Blood transfusion saves life. Hence providing safe and adequate blood should be an integral part of our services as Rotarians.

R I President Ian H S Riseley has also emphasized upon enrolling more and more of youth specially ladies as they constitute only 22% of the total membership. The future of Rotary will be safe and secure if we enrol young persons in large number who may take benefit from the experience of the senior members.

I totally agree with the views of R I President who has emphasized upon the importance of team spirit. You very well know that a single swallow does not make summer. You have to work in unison to achieve the targets set by RI President and me too.

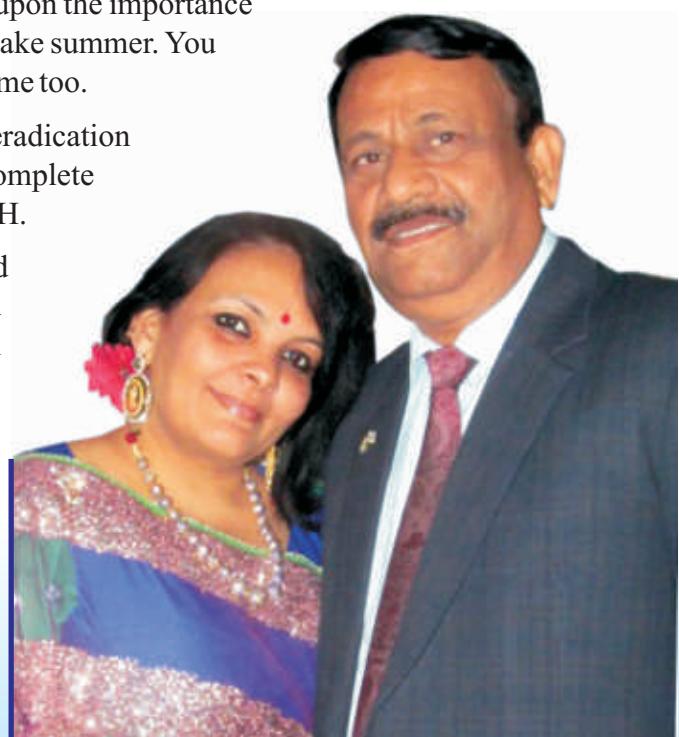

After getting pyrrhic victory over Polio by its almost complete eradication Rotary India Literacy Mission has launched a campaign for complete removal of illiteracy from India under the five verticals of T-E-A-C-H.

The journey is long and the time flies fast so gird up your loins and start your work right from 1st July to accomplish the tasks entrusted to you. You have the verve in you; you have the grit in you and with the necessary will power you will be able to achieve success in the mission. Be the agents of change and make a difference.

With best wishes,

Rtn. Vinay Asthana

District Governor

President Speaks

Dear fellow Rotarians,

There are as many reason to come to Rotary as there are Rotarians - maybe even a few more. But each of us has stayed in Rotary because it adds something to our own lives. Through Rotary, we are *Making a Difference* in the world; and the more involved we become, the more of a difference Rotary makes to each of us. Rotary challenges us to become better people: to become ambitious in the ways that matter, to strive for higher goals, and to incorporate Service Above Self into our daily lives.

What kind of difference Rotary clubs and individual Rotarians make through their service will always be their own decision. As an organisation, we are guided by the three strategic plan : to support and strengthen our clubs, to focus and increase our humanitarian service, and to enhance Rotary's public image and awareness.

In the year ahead, our clubs will have the support of a greatly augmented array of online tools, including a refreshed Rotary.org, a simplified Rotary Foundation grant application process, an improved My Rotary experience, and a rebuilt Rotary Club Central. As we look to strengthen our clubs, two specific challenges stand out in our membership; our gender balance and our average age. To keep our clubs strong, we need to build a membership that

The ultimate in sustainable service

reflects the communities we serve and that will continue to develop knowledgeable leaders for generations to come.

For many years, one idea has stood at the heart of all our service; sustainability. Sustainable service means our work continues to have a positive impact long after Rotary's direct involvement has ended. We don't dig wells and walk away; we make sure communities can maintain and repair those wells. If we build a clinic, we make sure that clinic has a way to keep running without ongoing support from us. And when it comes to polio, we aren't working to contain it; we're working to end it.

Eradicating polio is the ultimate in sustainable service. It is an investment that will yield not just a long-lasting but a permanent benefit, on a global scale. It is and must remain our No. 1 priority until the job is done.

For 112 years, Rotary has made a difference to more live, in more ways, than we can ever count or will ever know. Today, each of us bears a torch, its flame lit by Paul Harris, that has been passed forward from generation to generation, in *Rotary: Making a Difference*.

Ian H S Riseley
President, Rotary International

R.I. Director Speaks

Dear Rotarians,

The Rotary year 2016-17 has come to a close with many positives : great performance by the club, excellent team work and handsome contributions to the Foundation. In addition, during the year, globally Rotary created more than 35,000 leaders at the club level known as 'Past Presidents' and the district level about known as 'Past Governors'. Many new clubs have been chartered inviting more persons to join, serve and strengthen our organisation. All this adding to one more page in Rotary's 116-year glorious history. Not many organisations survive this long; and even fewer continue to grow as rapidly as Rotary has done while entering its 117th year.

The new Rotary Year (2017-18) will see a change of guard. This change which happens at every leadership level every year gives many Rotarians the opportunity to demonstrate their leadership skill and encourages other Rotarians to serve with renewed enthusiasm and energy.

Change is a constant in today's times. Change brings opportunity. We must grasp and use it to continue our good work to ensure a better future for those we serve. When someone asked a farmer, "What are you doing today?" he replied, " I am enjoying the hard work of the past." We do understand the farmer's nuanced response : after all we too have a legacy of more than 116 years. But the thought of what tomorrow will bring is always lingering in the back of our minds, urging us to do better.

Now, the farmer know that for the fields that are barren today to be ready for harvest tomorrow, the soil must be tilled and the seeds must be sown today in order to get a rich harvest. This is the thought lingering in the farmer's mind. But he know very well that between sowing and harvesting, there

Get set, go make a difference

are many steps which need planning, coordination, process and hard work. And, there is many a slip between the cup and lip. Finally, success only comes after accomplishing all the tasks at the right time.

We Rotarian know there is no such thing as over-night success. Thomas Edison once said : "genius is one per cent inspiration and 99 per cent perspiration". The best happens when we learn something, relentlessly practice it, improve upon it and then continue to learn more. Learning is an ongoing process. Learning is personal - it flexes with our needs, our learning style and our planning.

Rotarians work with well thought out plans and strategies and an army of 1.2 million Rotarians over 200 countries to serve the communities around us.

From July 1, we have full 12 months in front of us:

- **Twelve months of :**
- Opportunities
- Challenges
- Time to prove our leadership capabilities
- Actions and results
- Introducing New Members to Rotary
- Learning about needs of our communities
- Interaction and working as teams
- Exciting experiences
- Develop our skills of communication to work better
- Convert acquaintances to friends in the true spirit of Rotary
- Happiness, energy and enthusiasm and
- Contributing towards worthy projects through TRF.

To make full use of our 12 months, my dear Trend Setters, please proceed to achieve the goals of Rotary with our well trained team of District officers and Club officers !

From Pen of the Editor.....

Nature-worship is the main staple of our civilization. It has always been pantheistic in its approach towards nature. But with the growing materialism of the age, We have alienated ourselves from mother-nature. Wordsworth, who has been called as an arch priest of nature vehemently condemns the materialistic leanings of the people and laments the fact that we have bartered our soul for the sordid boon of materialism because 'little we see in nature that is ours'. we have become impervious to the beauties of nature due to the loss of sensitivity. Our heart does not dance with delight when we behold a rainbow in the sky.

We have become robots or moving automatons because of 'sick hurry and divided aims'. We are so much engrossed in the earning and spending of money that we have little time to enjoy the bounteous aspect of nature, therefore, we receive but what we give. We will have to pay a very heavy price for this apathetic attitude towards nature.

The conundrum of water-problem is well known. Without water we cannot survive. Water is an elixir of life. Realizing the magnitude of this problem our RI President has given a clarion call for tree plantation in the month of July as the new wheel of Rotary starts chugging on. Deforestation has brought manifold problems in its wake. Landslides and drying up of water resources are a few examples of the fury of nature. We now see nature 'clad in tooth and claw'. So, if we want to save this planet of ours from impending disaster we must take a pledge to plant at least one sapling not only in this month but in every month in order to make this world a greener place.

Development nowadays has become synonymous with the destruction of trees. This destruction of trees is the source of increasing greenhouse gases. Extentions of roads, new buildings, electrification etc. result in the callous felling of trees. Population explosion is another cause of this. If we have more trees then ecological balance and bio-diversity can be maintained. Every individual must strive to give a green cover to his house. Every balcony of the flat should be decorated with flowers and plants. With the threat of deforestation; with the threat of depleting sources of water; with the extinction of a few species of birds and animals, it is high time to intensify our efforts for a greener planet. Let us start today-not only to plant but to nurture the plants also.

RI President Ian H.S.Riseley has also given a call for blood donation in this month of July. I would also appeal to all the Rotarians to donate blood generously in order to save human life. All the Presidents and Secretaries are advised to organize blood donation camps and exhort the members to donate blood for this noble cause. There can be no better service to humanity than this.

I congratulate all the Presidents and Secretaries who have taken the responsibility to lead their respective clubs and carry the banner of the District to greater heights.

I would like to conclude with the words of Roosevelt,

'Happiness lies in the joy of achievement and the thrill of creative effort.'

(Franklin D Roosevelt)

Wishing you a year of creativity and activity.

Rtn. Dr. G.S. Nigam

From First Lady's Desk

Dear Friends,

I extend warm greetings and good wishes to all the Presidents, club officers and district officers, and each and every Rotarian for a successful Rotary year ahead.

Dear Rotary Spouse !

Families are important in Rotary and so are our spouses. Woman is an embodiment of several virtues like love compassion, sacrifice, service and so on and on. Service is the prominent quality of a lady which she carries throughout her life. Now, it is the need of the hour when have to bring our spouse out to serve at the bigger level i. e. to extend her helping hands to those underprivileged.

Women have a great potential. If they want they can change the face of the world. I hereby propose a few projects to be done by our Rotary spouses.

SATYAM

Satyam is to work for Maternal and child Health and Clean Drinking Water. So, spouses have to shoulder this responsibility of their husbands as they can go to the interiors and the Underprivileged areas of the towns and they can take care of the health and hygiene of mother and child. They can also work for providing clean drinking water.

SHIVAM

The Project Shivam is under Rotary's focus area Literacy. Education is enlightenment and knowledge is power. Our spouse's can do a lot in this field, be it adult literacy or sending a drop out back to school.

SUNDARAM

Spouse can do the projects to save our environment from pollution by doing plantation Reduce, Refuse, Reuse and Recycle of polythene and use eco- friendly products. For this purpose, essay writing, slogan and drawing competitions can be arranged in schools, anti polythene rallies or talks etc are some other options.

AWARDS

The best projects done by spouses under these three titles will be acknowledged in the award function. If we are able to achieve these targets with the help of our spouses, we will be able to make a Difference.
